Abstract

Purposes of the Study

The purposes of this study were two-fold : (1) to evaluate the ready of the servicer in providing pharmaceutical care to patients with gonococcal infections at drug store in Amphur Muang and Pattaya, Chonburi, and (2) to evaluate the knowledge of the servicer in providing pharmaceutical care to patients with gonococcal infections at drug store in Amphur Muang and Pattaya, Chonburi.

Methodology

The subjects comprised 31 servicer at drug store in Amphur Muang (one-each drug store) and 32 servicer at drug store in Pattaya (one-each drug store), Chonburi. The instruments of the study were knowledge testing and check-list of ready of the servicer in providing pharmaceutical care to patients with gonococcal infections. The study employed a percentage, summated score and Pearson's coefficient of correlation, for data analysis.

Findings

The findings of the study were as follow :

1. Most of pharmacists' knowledge in providing pharmaceutical care to patients with gonococcal infections in both Amphur Muang and Pattaya, Chonburi were

found to be at the moderate level. And for those who weren't pharmacist be at the low level.

2. The ready of the servicer in providing pharmaceutical care to patients with gonococcal infections were found to be at the low level.

3. The knowledge and ready of the servicer in providing pharmaceutical care to patients with gonococcal infections correlate only at drug store in Pattaya, Chonburi.
